

Landscape Blend #2

P L A N T I N G S O I L S P E C I A L I S T S S I N C E 1 9 6 8

PRO-GRO LANDSCAPE BLEND #2 CONTAINS:

Screened Sandy Loam, Fiber Life, Soil Life Compost, Specialty Screened Pumice

Sandy Loam - A natural, clean source located in Oregon

This is a true Willamette Valley Sandy Loam, not a clay and sand blend.

Fiber Life - Manure product produced in Oregon

Fiber Life is a by-product of the anaerobic digestive process. An anaerobic digester turns dairy manure waste into electricity. This process also produces safe irrigation water and the Fiber Life product. The anaerobic digestive process assures a clean, consistent, high quality product suitable for the nursery industry. This Product is produced within 250 miles from Portland, Oregon.

Soil Life Compost - Green waste compost produced in Oregon

This green waste product has been processed according to the highest quality standards. This process turns green waste into a high quality product suitable for the nursery industry.

Specialty Screened Pumice - Produced in Oregon by a ecologically sensitive company

This product is located within 350 miles from Portland, Oregon.

Thank you for allowing Pro-Gro Mixes the opportunity to provide you with this information. We understand the importance you place on superior service and product quality. You can be assured of our commitment to perform up to your expectations.
